Brief about Client Code Modification:

Client Code Modification means modification/change of the client codes after execution of trades. Stock Exchanges provide a facility to modify any client code after the trade has been executed to rectify any error or wrong data entry done by the dealers at the time of punching orders. However, such Client Code modification is subject to certain guidelines as to the time limit within which the client code modification is to be carried out, terminal/system on which such modifications can be done etc. The facility is mainly to provide a system for modification of client codes in case genuine errors in punching/ placing the orders. It is to be used as an exception and not a routine. To prevent misuse of the facility Stock Exchanges levy penalty/fine for all non-institutional client code modifications.
